the United States in their revolutionary sures begins to ripen the harvest of tribulation for the nation. When the lawmakers themselves begin to cast discredit upon the laws of their own making-when war is openly declared against the integrity of the Presidential title-when late Confederates are jubilant over the labor trouble Democratic Portan-ry has joined the of the North, and incite the worst passions of the populace against the Governmentagainst the majesty of the law and the in tegrity of the Government was struck at Fort Sumter. Then followed a bloody war, then a surrender, then a proclaimed peace-which on the part of the conquered had but little meaning-then came laws of reconstruction, amendments to the Constitution, guarantees of equal rights to all citizens, none of which have been duly respected by the people of the conquered ter-ritory, from the day GRANT declined the sword of LEE at Appomattox down to the recent revolutionary movement of POTTER

in the House of Representatives.

During all these years the lawlessness of the South, the brutalities, oppressions, and murders that have been perpetrated there under assured immu from punishment, have conspired to spread a like spirit among mal-contents at the North and West. The Mollie Maguires of Penusylvania, the Communists THE nomination of the Hon. A. HERR of St. Louis, and the threatened and attempted labor outbreaks throughout the land are the germinations of the seed sown by unpunished outlawry in the late insurgress against the integrity of the Presi-dential title is but a signal of disorder is equivalent to an election. He dealt a manly, open, and deadly of the Presidency, how can we hope that blow at the bill, and was prominent among such a pernicious example is to be lost with malcontents and go without bearing the very worst fruits of disorder? The times and stalwart men that Congress should be are perilous, and the greatest peril centres in the teachings and examples of Bourbon Democracy. This fact is too patent to be denied and too alarming to go unbeciled.

GAS FOR THE PROPLE. The manufacture and sale of gas to the people of cities has been rendered, under the force of circumstances, to a great extent a monopoly. The investment for the manufacture and supplying of this almost indispensable article of domestic and business ask \$500 for the fee of it, the Government baving paid \$30 per annum as rental for its use up to this time. The land is not regarded as unjustly high at the fluore and the state of the st all corporations. The city of Washinnton has one gas company that furnishes fair gas at living rates to the stockholders if not to statement that there are many ex-Confederates in both Houses of Congress who are no less guilty of wrong than those who died at Camp Chase, and express the opininconsisient or not with circumstances, is ates in Congress that they are as guilty as consumer has no alternative but to pay or Porter and his Democratic allies ave his supply cut off. This is a brief statement of the case, and thus far gas consumers at the National Capital are entirely subject to the policy of one company, which is evidently inspired as all incorporations are with the idea of liberal dividends, and that appears to be their chief consideration.

An effort is now being made in Congress A PLEA FOR THE FELON.

If it is done, and it is clear that the cople are to be benefited, why then let he bill be passed that an experiment in the way of relief to gas-consumers may be entered upon. We have no quarrel with the existing gas company. We expect to use and pay for their gas at their own price, and subject to their own rules of measure ment or accounting, no matter how arbitrary or unjust, for we have no alternative; bu we entertain the opinion that it is about time this matter of furnishing light to the people of Washington shall be opened to ompetition. AFFAIRS IN SOUTH CAROLINA. Neither the Government nor the people utside of the Southern States know much of the ruling policy of the whites there toward the colored people who were left in their midst at the close of the war. There does not appear to be any respect for the Constitution of the United States, and esecially for the guarantees it extends to the black citizen of equal rights before the law. The Democrats of the South appear to be a law unto themselves, which, so far as it relates to the Republican, white or black, is a higher law than the Constitution or the statutes of Congress. Indeed, there is but very little recognized law in that secof country except that which can be made to oppress and crush the freedman into the very earth. Neither do the outrages that have been and are now being perpetrated find their way into the newspapers, lest they shall become matters of public notoriety, examination, and com-ment. Neither the public journals nor the courts of some of the Southern States take my cognizance of outrages and murders if the victim is a black or white Republican. It is the purpose of the Democracy to wipe out every vestige of Republicanism, if it has to be washed out with human blood. The process is a little slow, but very sure, and the work is silently performed, so far and the work is sticked, process and the judiciary are con-cerned. This statement may be denied, out it is nevertheless true and susceptible of proof, if the witnesses dared to tell the ruth and expose the real condition of

things. We are in receipt of a letter which has been handed us by the party to when it is written, which tells the tale in a very humble and truthful manner, and which we publish below, for the reason that it is symptom of the social and political disthat now prevails in South Carolina It is from a colored girl to her brother in

It is from a colored girl to her brother in this city:

Yorksville, S. C., May 24, 1878.

My Dear Brother: I wrote you sometime ago, but have not got any answer. We are living in the State of South Carolina. The Democrats are very contrary and turbulent. They have gone so far as to have people poulished under the pretence of sauciness. The intendant of this place had a young colored man hung up by the thumbs for sauciness, as to termed it. There was an excursion from this place to Chester, recently, at which a young white boy threw a stone that struck a colored woman out the breast with such force that she is since reported as dead. The sheriff of the county made some inquiry into the matter to assertain if the woman was saucy to the boy. This was the extent of the inquiry, and the offense goes unpunished.

This is the condition of things into which we are drifting. No haw, no protection for the poor, helpless freedmen and their wives and children. Your eyes are not open or you would see into the matter about which we here lave been asking you. You must see the Minister of England and see if that government will not help us to emigrate to Canada. We are in a perious position. If you were here you would see and know for yourself. You must not be fooled about this matter. They (the Democrats) are holding caucinses every night. Even the females are forming chuts against us. You must watch this snocke of terrible darkness, and you may yet feel it in Washington.

They (the white Democrats) are drilling at

this snocke of terrible darkness, and you may yet feel it in Washington.

They (the white Democrats) are drilling at night and seem to be making preparations for war. There are none for us to speak to in this place, neither colored nor white. The poor whites are very mean now and there are many Domocratic "nigs" as they are termed among the whites. C. is very low spirited.

Here is a mere glimpse behind the scenes in South Carelina has it has the consequences.

in South Carolina, but it shows that oppression is the ruling principle of action toward the colored race in that State. It is simple, but truthful. It tells what no South Carolina journal will reveal to the world-that the whites are armed, are constantly drilling and preparing for war. What occasion is there for war preparations in South Carolina? Against whom do they propose to wage war when they are fully prepared? Not among themselves! But be assured this forms a part of the revolution which are incubating at the National Cap-ital to oast the President and subvert the Government to their own sordid purposes. The States of South Carolina, Mississippi, and Alabama, though estensibly a part of this Union, are as exclusive and secretive in their internal movements as they were during the rebellion. The people are sworn to secrecy and the press is muzzled either by fear or disloyalty, and the President is un-consciously, to all human appearance, reposing listlessly upon a volcano that is lia-ble to disturb him by its upheavings at any day. He may or he may not learn some thing to his advantage if he will write to that "great and good man, WADE HAMP-'TON," for information regarding the plotings of the Democrats of his State against the validity of the Presidential title South, except nominally, does not appear to be any more a part and parcel of this Union now than it was in 1863.
